Age is no barrier to a beautiful smile

There is no reason to put up with stained, crooked or missing teeth.

Whether you are twenty-five or eighty-five we can transform your smile.

Dr. James Willis BDS (Uni. Bristol)

James, who has been working in Bath and Totnes, joins the South West Dental Clinic bringing with him a wealth of knowledge and experience gained since qualifying from Bristol Dental School in 1981 where he studied as a mature student.

He is a member of the International Academy of Advanced Facial Aesthetics (IAAFA) and lectures extensively to dental colleagues.

James starts on 27th February 2007 and welcomes patients looking for quality dental health care. His gentle assured manner makes him popular especially with nervous patients. He offers a particularly focused personal service covering tooth coloured fillings, crowns, and veneers.

In addition, James has special interests in facial aesthetics, having gained ten years of experience. He can provide muscle relaxing treatments to smooth away frown lines, crow's feet, and horizontal forehead lines. Also treatments with collagen, hylaform, restylane, and hydrafil correct wrinkles on the lower part of the face and with these versatile materials he can enhance and define your lips as well!

Now doesn't that give you something to smile about?
