Radford Heath Dental  
July

A unique Dental Implant Centre is being launched in the South West of England.

As a unique dental training facility the centre is able to offer education and training for the whole dental team.

As one of a number of initiatives **Dr Roger Moore** BDS, LLM, MFGDP (UK), MMED SCI (Dental Implantology) will be providing advanced clinical procedures and techniques in a highly specified clinical environment, serviced by a combination of 14 years clinical experience in implant practice, and 20 years of experience within the laboratory technical team.

Giving yourself, your team and your patient's access to a unique referral centre that has been long awaited in the South West.

Radford Heath Dental  
July

The Centre will provide training and education for dentists in Implantology to encourage colleagues to become involved in one of the most exciting developments in dentistry for years.

A continual development programme is also being put into place to keep the whole dental team informed of current thinking in the dental world.

You and your patients will have access to the Dental Centre which is fully equipped and supported by Nobel Biocare, one of the world's leading implant systems.

This means that a wide range of treatments from single tooth therapy, implant retained over dentures to immediate full arch fixed bridges will be available.

## How can we help?

A range of hands-on courses featuring surgery and prosthetic training will be available to colleagues; you will also be invited to assist in live surgery.

If you would like to refer a patient or receive more information about Implantology based CPD in Torquay, then please contact:

**Roger Moore 01803 211123**

Give your patients the choice. We are here to help!
