Nobel Biocare's newest CAD Scanner, the **Procera Forte**, arrives at Radford Heath.

This, the newest and top of the range scanner from Nobel Biocare, is the optimal scanner for handling small or large preparations including:

Full upper or lower arch which can be screw retained (implant) or cemented to dentition.

2-4 unit bridges.

Single crowns.

Laminates.

Custom Abutments.

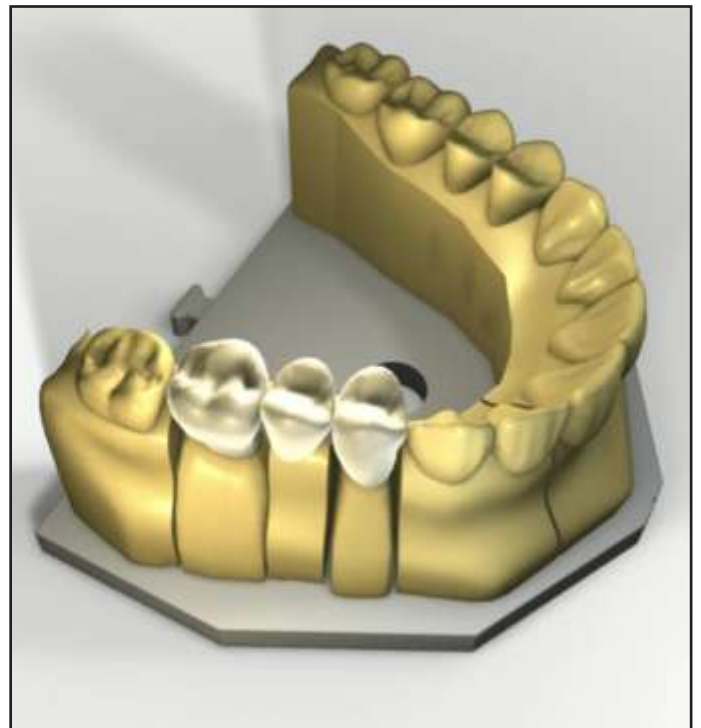

Material choices include Titanium, and Zircona.

Having the Procera Forte means Radford Heath are able to offer precision milled restorations for dentists using the "Nobel Guide" implant procedure.
